

FREE ^{the} WATER

DO YOU WANT MORE DAYS TO FLOAT, BOAT, FISH, AND RAFT THE KERN?

USE THE QR CODE TO SIGN THE PETITION TODAY.

Join whitewater boaters, local businesses, river advocates, and all lovers of the Kern in signing a petition to responsibly reduce SoCal Edison's de-watering of the Upper Kern. Help keep our river flowing higher, longer... and more like Mother Nature intended!

Due to the massive deployment of solar and other renewable generators, Southern California has **too much electricity on the grid during daylight hours much of the year**, and the small amount of energy that KR3 produces with Kern River water is not needed. We are advocating that the river be allowed to flow free during those times so that people - and wildlife - can better **enjoy the benefits of a healthy and vibrant Kern River**. Help spread the word!
